

Spectra Engobes™

“Just Add Water ”

Spectra Engobes™ individually engineered for ease of application, performance and controlled repeatability.

Availability of raw materials, blending capabilities, technical support as well as the application expertise results in an unmatched value added for your products.

We can also custom design a product to your individual specifications.

Spectra Engobes™ extensive quality testing to ensure superior performance.

Kiln fuel, Temperature, and your raw clay can cause some variation in color. Testing these products in your environment will ensure desired results.
